

Composition of existing walls and contemporary railings

Coastal garden detail

Coastal garden planting one year after completion

1. The project represents a significant investment in public space regeneration for the town of Dunbar, providing well used outdoor performance and gathering space in a unique setting;
2. The design represents a seamless fusion of landscape, building conservation and art, a true *Gesamtkunstwerk*;
3. The project delivers high quality contemporary design within the context of the sensitive conservation of a Listed Building;
4. The project was led from the start by the Landscape Architects and is a exemplary demonstration of what Landscape Architects can add to community and enviromental regeneration;
5. The design saves a unique structure from further ruin and reinvents it as a new public space and;
6. The project demonstrates exceptional workmanship, traditional construction methods and detailing.
