

03. Strategies and actions

A catalogue of 60 actions is presented as index cards. Those indicate the alignment of the actions with the SO, the diagnostic components on which they impact, the conditions for their implementation, and the level of citizen consensus acquired.

A Criteria Guide for intervention in public space and in buildings has also been prepared in order to have an agreed roadmap for interventions on heritage elements, both built and public space.

To facilitate the implementation of the Plan and promote the regeneration of the neighborhood, 6 key actions are identified as Driving Projects, and a physical intervention proposal is made: the Pilot Project.

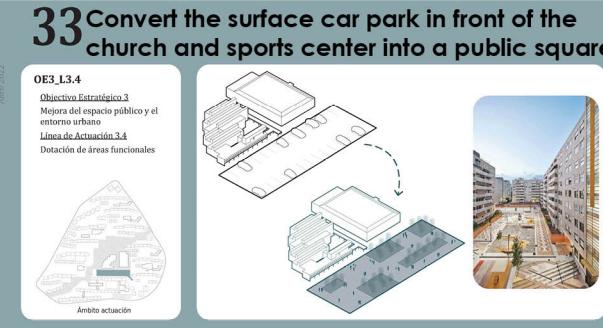

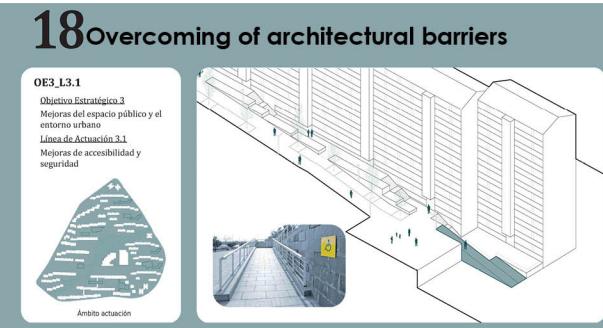

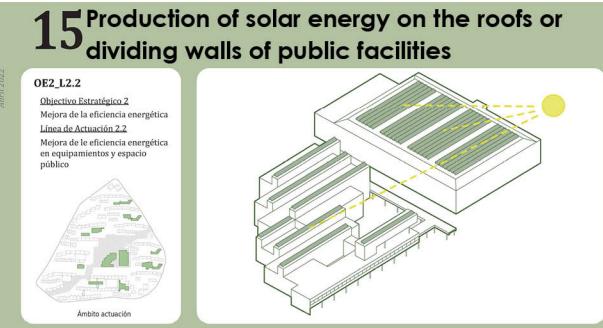

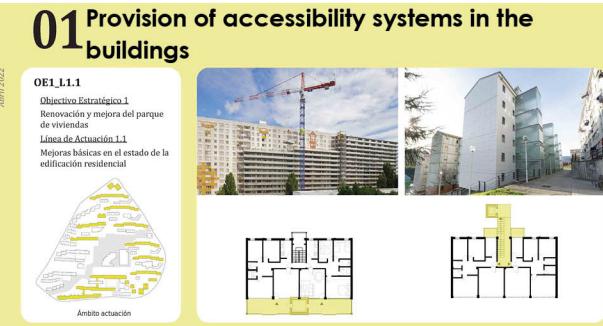

This project redevelops one of the main entrances to the neighborhood and connects the northern area axis. The Pilot project is the first visible action and it will provide a test bench to assess replicable and scalable solutions for the entire neighborhood.

Se plantea un catálogo de actuaciones (60), presentadas como fichas. En éstas se indica su alineación con los OE, los componentes de diagnóstico sobre los que impactan, los condicionantes para su implementación, y el nivel de consenso ciudadano adquirido.

Se ha elaborado también una Guía de criterios de intervención en el espacio público y en la edificación con la finalidad de disponer de una hoja de ruta consensuada para las intervenciones sobre los elementos patrimoniales, tanto edificados como de espacio público.

Para facilitar la implementación del Plan e impulsar la regeneración del barrio, se identifican 6 acciones clave como Proyectos impulsores, y se realiza una propuesta de intervención física como Proyecto Piloto.

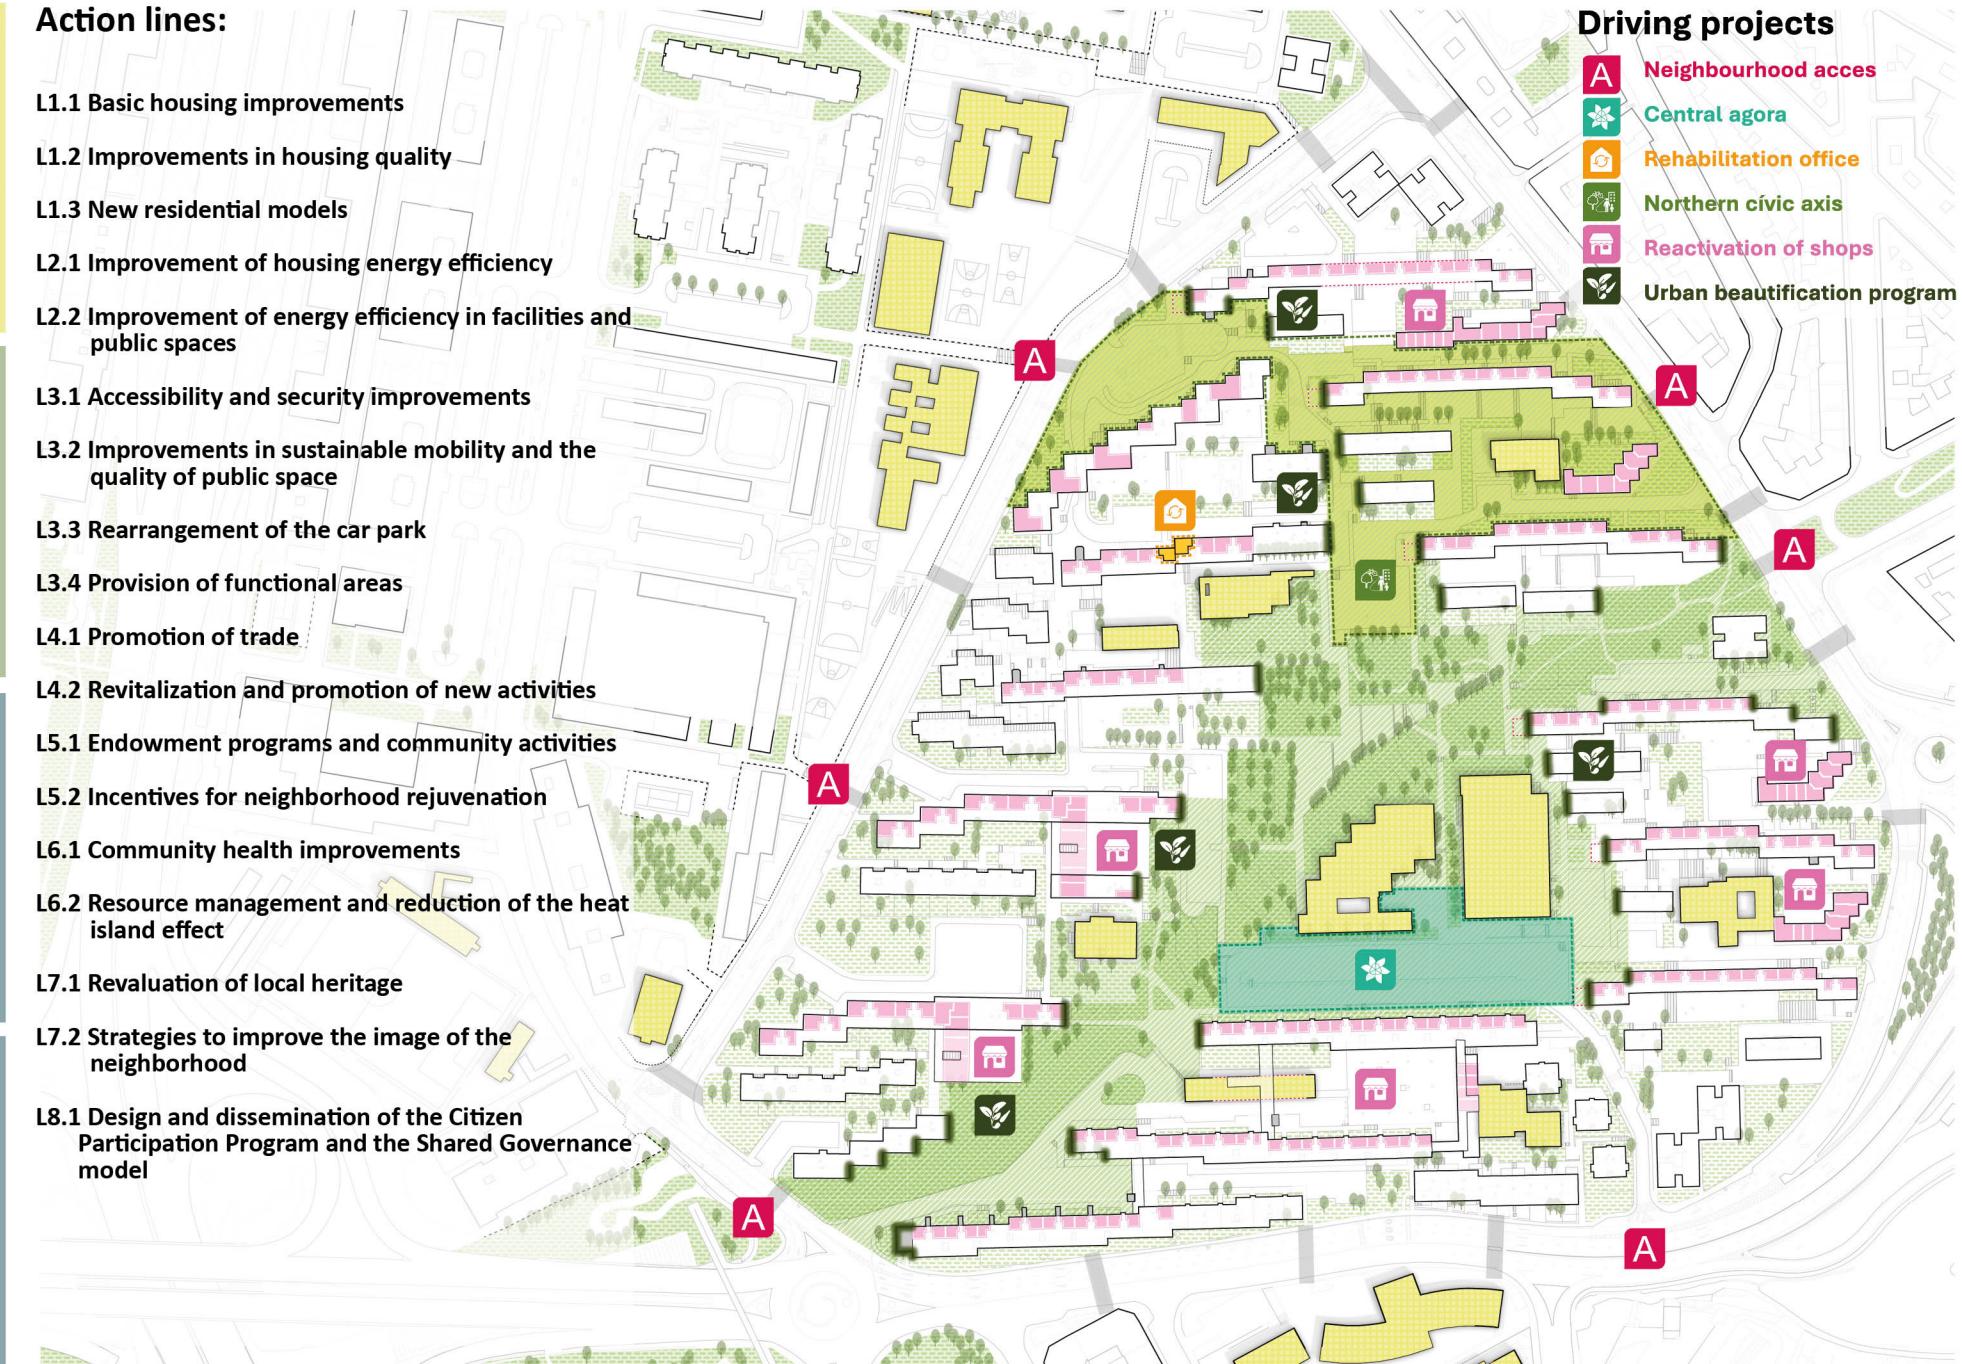

Este proyecto reurbaniza una de las principales entradas del barrio y el eje conector de la zona norte. Además, se plantea como la primera acción visible que permitirá disponer de un banco de pruebas para valorar soluciones replicables y escalables al conjunto del barrio.

Action lines:

- L1.1 Basic housing improvements**
- L1.2 Improvements in housing quality**
- L1.3 New residential models**
- L2.1 Improvement of housing energy efficiency**
- L2.2 Improvement of energy efficiency in facilities and public spaces**
- L3.1 Accessibility and security improvements**
- L3.2 Improvements in sustainable mobility and the quality of public space**
- L3.3 Rearrangement of the car park**
- L3.4 Provision of functional areas**
- L4.1 Promotion of trade**
- L4.2 Revitalization and promotion of new activities**
- L5.1 Endowment programs and community activities**
- L5.2 Incentives for neighborhood rejuvenation**
- L6.1 Community health improvements**
- L6.2 Resource management and reduction of the heat island effect**
- L7.1 Revaluation of local heritage**
- L7.2 Strategies to improve the image of the neighborhood**
- L8.1 Design and dissemination of the Citizen Participation Program and the Shared Governance model**
